- Plastic Table Cover

AGE GROUP: 9 and up
PREP TIME: 5 minutes
PROJECT TIME: 45 minutes

YOU WILL NEED:
- Containers for Water
- Pencils
- Paper Towels

GP1068

INSTRUCTIONS:

1. Attach four foam squares to the inside or brown side of your car shape template as shown in Figure A (the color of the foam squares does not matter as they will be hidden).
2. Fold the car shape template on all the crease lines.
3. Glue the tabs to each side following the car silhouette (see Figure B). Let dry completely.
4. Lay out your design with pencil on your race car before you start to paint.
5. Paint in the design and let dry.
6. Attach the four wheels with the included nails as shown in Figure C. Push the nail through the paper car template at each pre-punched wheel hole, also through the hidden foam square from Step #1. Now the wheels should be secure but turn freely for racing!
7. Fold the bottom flaps up and insert the tab into the slot. You're done, great job!

FIGURE A

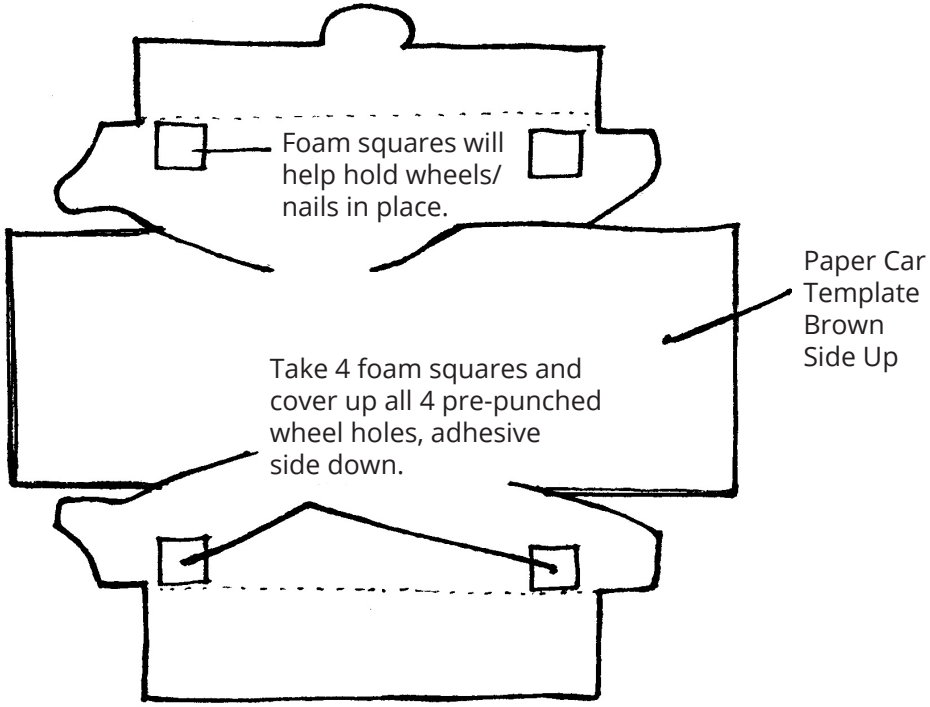

FIGURE B

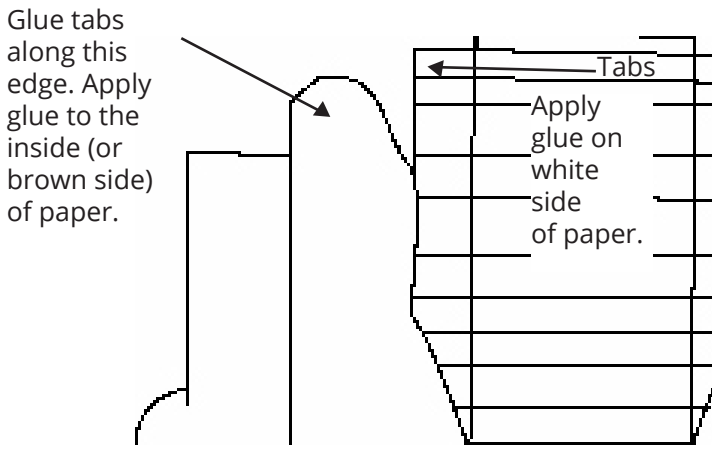


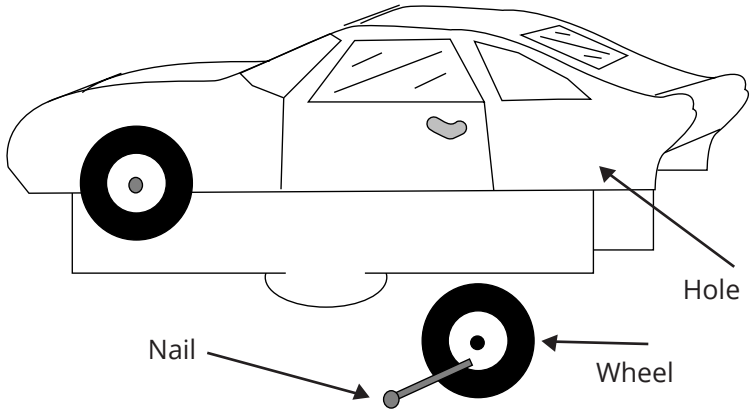
HELPFUL HINT: Glue a few tabs at a time. Use a small amount of glue and hold each tab in place for 10-30 seconds. If you apply glue to both the brown side of the paper and white side of tabs (see Figure B) and let set for a minute to get tacky or dry slightly then press together, it will stick nicely and shorten the drying time! You can even use glue dots to save even more time!


FIGURE C
