INSTRUCTIONS:

1. Choose a design for your scarf. It may be helpful to sketch it lightly in pencil first.
2. Color your scarf using fabric markers. It may be helpful to color those areas farthest away from your hand first, to prevent getting marker color on your hands. Or, use a paper towel to lay under your hand if it is necessary, to prevent color from getting on your hands. Reposition the towel as needed, making sure that the color from one area on the towel does not get onto another area of the scarf. Fabric markers are permanent markers.
3. Allow time for the marker colors to dry. To set the color, in order to prevent bleeding of the colors, or if the scarf is to be washed, you should first set the colors by ironing it with a hot, dry iron, using a cloth towel or another piece of fabric between the scarf and the iron. This should be done by an adult.
