INSTRUCTIONS:

TIP: If each color of sand is used over a sheet of paper, then the excess sand can be poured back to use again later. Fold the sheet in half before using the sand. The fold makes it easier to pour back when finished.

1. Snip a small corner off of each bag of sand, about 1/8". This will allow the sand to pour out of the bag slowly.
2. Fill the bottle with layers of various colors of sand, pouring in just a little bit each time. It is helpful to tilt the bottle in different directions in order to make the sand lay in different patterns.
3. When the bottle is full, put on the cap. At this point it might be helpful to add some glue to the inside area of the cap. This will make the cap stay on permanently, and not loosen.
