

Set a time limit for your game or decide to stop when you have gone through all the cards in the deck. Begin the game by dealing 25 pennies to each player. The remaining pennies should be placed in the middle of the playing surface. This will be the "kitty". Next, shuffle the cards and place them in a pile, face down, on the playing surface. Choose one player to start. The first player draws a card and reads it out loud (alternatively, the facilitator can read the cards for all the players). The player then follows the instructions on the card. The card will instruct the player to give or take pennies from the center "kitty", their own pile or from the other players in the game. Suggested number of players: 4-8.

Item #17820
