

Mosaic Stone Cement™

Fast drying, reinforced indoor cement dries to smooth, white finish in 1 hour!

DIRECTIONS:

Measure appropriate amounts of MosaicStone Cement (MSC) and add water gradually. Stir 2-3 minutes, or until mixture is pourable and smooth. Pour MSC slowly and evenly into mold. DO NOT fill completely to the top. Tap mold lightly on the top edge to bring air bubbles to the surface. Let MSC dry in mold for 1 hour. Turn mold over and remove. MSC may feel a little damp. Let dry for 24 hours before using. To determine the amount of cement for your project, fill your mold with water. Measure the amount of water used, this is the amount of cement needed for the project. Divide this amount by 3 to determine the amount of water.

To Color: Use Jennifer's Mosaics Colorants, follow directions on label.

WARNING: Eye Irritant. Precautions: Keep away from eyes. First Aid: If eye contact occurs, rinse with tap water for 5-10 minutes. If irritation persists, seek medical attention. For further health information, contact your local poison control center.

Caution: This product contains crystalline silica sand which is known in the State of California to cause health issues
