### INSTRUCTIONS:

1. Lay project pieces on a clean flat work area.
2. Snap mold together.
3. Pour crystals into mold. You can mix colors if you like.
4. Tap the mold slightly and fill mold until the “ball shape” is full of crystals. Don’t overfill.
5. Submerge the mold in the cold water for 5 minutes.
6. Remove mold from water and let sit on foil or plastic wrap for 7 minutes.
7. Pop open mold and carefully remove the ball. Ball will be sticky.
8. Place ball on foil or plastic and allow to dry at least 30 minutes.
9. Wash your hands when project is complete to remove any crystal residue from your hands.

**NOTE:** If you have difficulty removing the ball from the mold, try resubmerging the opened mold in the water and removing the ball out of the mold while in the water.
