

# General Wood Instructions

## Sanding

The rule of sanding is "Never across the grain".

1. Do not tear sandpaper. If you do, the ragged edges will often scratch the wood surface.
2. For flat surfaces, wrap a piece of sandpaper around a block of wood or use a store bought holder. Start with a coarse grade of paper and finish with a fine grade of paper(not included).
3. Be consistent. Do not sand one area with fine and another with coarse grade.

## Staining

1. Be sure the wood surface is smooth and clean. Stains can accentuate any roughness or scratches of cross grain sanding. Wipe off any dirt or dust with a soft cloth.
2. A base coat of sealer/primer and a light sanding before applying stain will insure a uniform stain.
3. Apply stains in one direction following the wood grain. Use a soft brush or foam brush. Let the stain penetrate the wood, then wipe off excess stain with a soft cloth.
4. If stain looks too dark, dampen the cloth with water/thinner and wipe until you achieve the desired color. If stain is too light, let dry, then apply another coat of stain and wipe off.

## Finishes

1. Outdoor projects may be finished with polyurethane or varnish.

**These are toxic and must be used in a well ventilated area.** Indoor projects may be finished with decoupage or left unfinished.

## Safety First!

This Product May Contain Silicon Gel Packets.

## Product Instructions:

- 1▶ For each bug case, sand one bottom and two ends – one end with a hole and one without. Glue an end piece to each end of the bottom. Set aside to dry completely.
- 2▶ Measure and cut a piece of netting approximately 5" x 8". This will be large enough to cover the top of the bug case from end to end and side to side.
- 3▶ Spread glue around the top and sidel edges of the ends and along the sides of the bottom. Lay one 5" side of the netting neatly along one side of the bottom. Carefully bring the netting over both rounded ends, pressing it in place with your fingers. Let dry completely.
- 4▶ Trim any excess netting from the edges with the scissors. Place the cork in the end hole to keep your bugs safely inside. You may decorate your bug case with your own paint or markers if you wish. Let dry before using.
