PREPARATION INSTRUCTIONS:

1. It is easiest to punch out the pieces from the foam sheets ahead of time. Make a pile of kite shapes, a pile of bow shapes and a pile of foam squares in the center of the work surface. Keep the punched out sheets.
2. Pre-cut the kite string into pieces and put with the foam pieces.

INSTRUCTIONS:

NOTE: This project “sandwiches” the string in between the foam pieces. Follow the steps carefully.

Have each person:

1. Choose his/her foam color combinations.
2. Lay the kite shape for the back of the project on the work surface with the self adhesive side up. **DON'T** peel the paper off yet.
3. Take a piece of kite string and fold it in half. Lay the kite string on top of the kite shape with the center loop sticking above the top of the kite shape approximately 4". The ends of the kite string should hang together out of the bottom of the kite piece (this makes the tail). Each person can adjust how long the tail will be. Just trim the kite string with scissors.
4. Remove the kite string off the foam kite shape. Peel off the paper on the foam kite shape with the sticky side up.
5. Reposition the kite string similar to Step 3. Make sure the kite string is together at the bottom point of the kite.
6. Peel off the top foam kite piece and carefully match it to the bottom foam pieces. Press the pieces together.
7. Peel the paper off 2 foam bow pieces, lay one on the work surface. Put the kite string “tail” through the piece, match the 2nd foam piece to this and press together. Repeat this step with the other pairs of foam bow shapes. **NOTE:** The foam is really sticky. If pieces are not lined up, it is hard to reposition.
8. Decorate both sides of the kite with the foam squares. You can also use the leftover foam from the die cut sheets to cut shapes and lines to add detail to the kite and bows. **TIP:** Refer to the finished photo for assembly.

MORE IDEAS: Add details with glitter glue or permanent markers!
