Instructions:

Your slides are pre-assembled, so they will just need to be drawn and colored. Choose from the themes below, or create your own theme for the slide. When coloring is complete, assemble the slide by inserting the sheet into the middle between front and back. Then the center sheet may be moved to show the appropriate stage in the cycle sequence. After completing the growth chart, secure it by using the hook and tab. Place it one foot above the floor and mount with tape, tack or nail.

Here are some theme suggestions:

1. Leaves found in your local area
2. Food chain- example- grass, grasshopper, rat, snake, hawk
3. Penguin Life Cycle
4. Spider Life Cycle
5. Nutrition food groups
6. Fish Life Cycle
7. Astronomy
8. Animals at the Zoo
9. What do you see at the beach
10. Musical Instruments
11. Weather
12. Things you can recycle
13. Trees in your area
14. Birds in your yard
15. Most fun things about camp
16. Fitness chart
17. During Autumn I see—turkeys, pumpkins, corn, leaves
18. Geometric Shapes
19. Chores to be done today
20. Chronological History on any topic
21. How large is it? (measurements of objects, plants or animals)
22. 5 Things about you

More Ideas:

1. After the charts are finished, make up some questions about the information included on them or use them as a game to test your friends.

2. Use the growth chart to track changes in the children's heights by putting their names on repositionable tape and onto the chart.

Notes:
