

MORE IDEAS!...

Any material can be set into the clay- Try small sticks, acorns, sand, sequins, etc.

Try using this as a planter- Fill with dirt instead of birdseed.

Bird seed
Containers for water
Black Marker

S&S Worldwide

INSTRUCTIONS

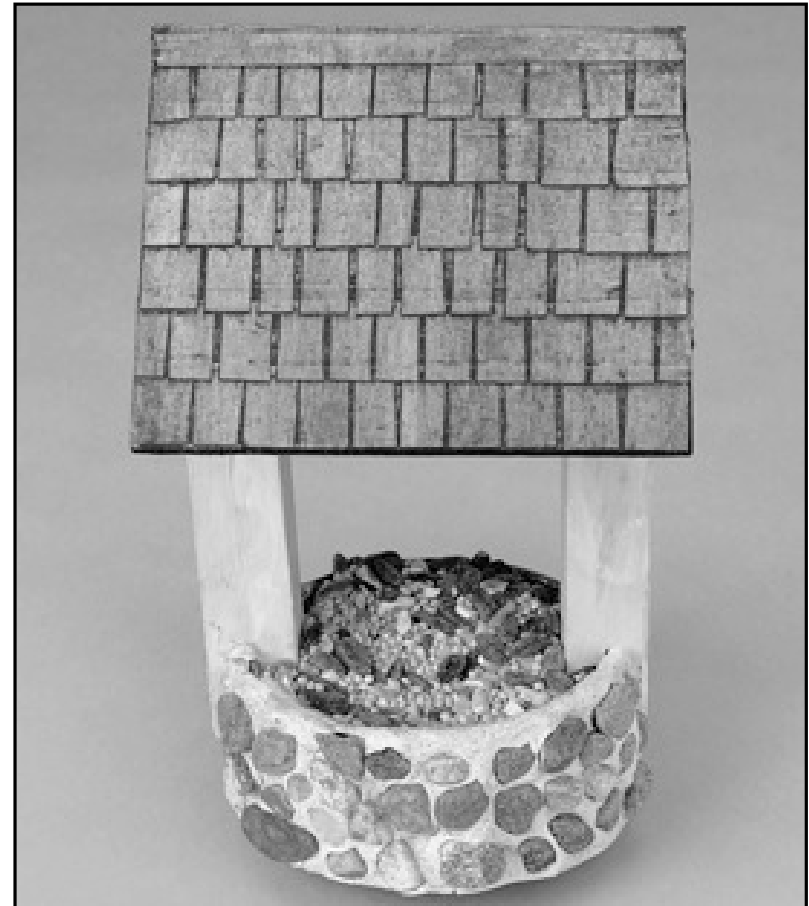

Project Instructions:

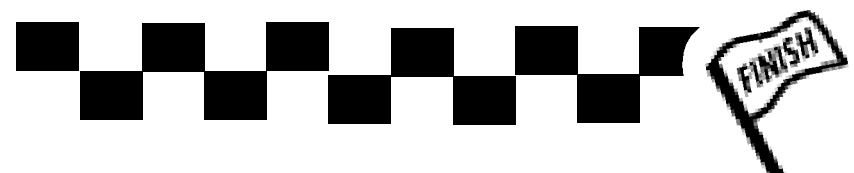

This kit is designed to utilize your recycled flat can, and stones or shells from nature.

1. Sand the sides and posts.
2. Wipe off excess sanding dust from the wood.
3. Push the posts onto opposite sides of the can.
4. Paint the roof. Allow to dry.
5. You may add marker lines to make the roof look like roof tiles.
6. Paint the posts. Set the roof onto the posts while paint is wet, so that the roof adheres to the wood posts.
7. Put the clay in a thin layer around the outside of the can. Set the stones or shells into the clay before it dries.
8. Sprinkle sand or dirt onto the clay to make it look more natural or paint the clay a natural color, by mixing the colors of paint. (white with a drop of orange and a drop of black make a terra cotta color which is nice.)

Note: The paint may also be thinned with water in order to look more natural. Allow to dry.

Watch the birds enjoy a snack in the birdfeeder you have created!

GREAT WORK!
