How to Make A Gingerbread Man With Fuse Beads

Fuse Beads are one of my favorite craft activities, especially around the holiday! It is also a great craft for children. I created a cute Gingerbread Man to use as decoration for my home. There are only a few materials and it is a quick and easy craft activity.

Materials:

- Fuse Bead Pegboard
- Fuse Beads
- Fuse Bead Ironing Paper

To create the gingerbread man, I used the bear shaped pegboard. Start by sorting out what colors you would like to use. This makes it easier to put the beads on the pegboard. I chose brown for the body, white for the face, arms, and legs, and yellow for the buttons.

Now you can start putting the beads on the pegboard. You will see I left out the ears! This bear pegboard works perfectly for a gingerbread man.

Next, cover the beads with ironing paper. I use a cutting board to work on just to be safe. Set your iron to medium and use a swirling motion for about 30 seconds to fuse the beads together evenly. You can decide if you would like to iron just one side, or both.

Enjoy your adorable gingerbread man! You can also use a magnet to put him on your refrigerator.

If you have a group of children or seniors who LOVE fuse beads, use our Fuse Bead Activity Pack which includes all of the materials!
